

NORTH DAKOTA RESOURCE MANAGEMENT PLAN OIL AND GAS LEASE STIPULATION AND REVIEW AREAS

Bureau of Land Management
Dickinson District
1988

The need for oil and gas lease stipulations and/or special review prior to leasing is indicated within each township where appropriate. Identification of possible stipulations in a township means that there is at least one parcel of Federal oil and gas within that township that will require special review for the identified stipulations in all cases. Stipulations will only be applied to leases where necessary.

LEGEND LEASE STIPULATIONS

- SAGE GROUSE** — No surface occupancy or use within 200 feet of sage grouse strutting grounds
No seismic exploration, construction, or other development within two miles of sage grouse strutting grounds during the period March 1 through June 30.
- FERRUGINOUS HAWK** — No surface occupancy or use within one-half mile of ferruginous hawk known to have been occupied at least once within the previous seven years.
No seismic exploration, construction, or other development within one-half mile of ferruginous hawk known to have been occupied at least once within the previous seven years.
- MISSOURI RIVER FLOODPLAIN** — No surface occupancy or use within the Missouri River floodplain.
- WILDLANDS** — No surface occupancy or use within one-half mile of prairie falcon nests known to have been occupied at least once within the previous seven years.
No seismic exploration, construction, or other development within one-half mile of prairie falcon nests known to have been occupied at least once within the previous seven years.
- GOLDEN EAGLES** — No surface occupancy or use within one-half mile of golden eagle nests known to have been occupied at least once within the previous seven years.
No seismic exploration, construction, or other development within one-half mile of golden eagle nests known to have been occupied at least once within the previous seven years.
- PRAIRIE DOG TOWNS** — Motorized travel is restricted to maintained roads during the period March 1 through June 1. Exceptions will be allowed for emergency or extraordinary circumstances if approved by the Authorized Officer.
- ELK CALVING RANGE** — No seismic exploration, construction, or other development on elk calving range during the period April 1 through July 1.
- BIGHORN SHEEP WINTER RANGE** — No seismic exploration, construction, or other development on bighorn sheep winter range during the period December 1 through April 1.
- BIGHORN SHEEP CALVING RANGE** — No seismic exploration, construction, or other development on bighorn sheep calving range during the period April 1 through June 15.
- PRONGHORN ANTELOPE** — No seismic exploration, construction, or other development within 1,000 feet of pronghorn antelope calving grounds during the period April 1 through June 15.
- WHITE-TAILED KITE** — No seismic exploration, construction, or other development within 1,000 feet of white-tailed kite nesting grounds during the period April 1 through June 15.
- SWAINSON'S HAWK** — No seismic exploration, construction, or other development within 1,000 feet of Swainson's hawk nesting grounds during the period April 1 through June 15.
- WHITE-FootED FERRET** — A black-footed ferret inventory may be required prior to any development.

- H FORT UNION HISTORIC SITE** — No surface occupancy or use within the visible area within a 3.5-mile radius unless the lessee demonstrates to the Authorized Officer that visual impacts can be satisfactorily avoided or otherwise mitigated.
- NATIONAL AREAS** — No surface occupancy or use on federally-designated natural areas, state-dedicated nature preserves, or state-managed natural areas.
- RIPARIAN VEGETATION (HABITAT)** — No disturbance of riparian areas of wetlands, intermitent, ephemeral, or perennial streams and rivers will be allowed except for essential road and utility crossing.
- ELK ROAD VEHICLES** — Motored travel is restricted to maintained roads during the period March 1 through June 1. Exceptions will be allowed for emergency or extraordinary circumstances if approved by the Authorized Officer.
- ELK WINTER RANGE** — No seismic exploration, construction, or other development on elk winter range during the period November 30 through May 1.
- ELK CALVING RANGE** — No seismic exploration, construction, or other development on elk calving range during the period June 1 through July 1.
- BIGHORN SHEEP WINTER RANGE** — No seismic exploration, construction, or other development on bighorn sheep winter range during the period December 1 through April 1.
- BIGHORN SHEEP CALVING RANGE** — No seismic exploration, construction, or other development on bighorn sheep calving range during the period April 1 through June 15.

LEASE NOTICE

- D PRAIRIE DOG TOWNS** — A black-footed ferret inventory may be required prior to any development.

STIPULATION REVIEW AREAS NOT MAPPED

The following stipulations will be applied if the situations arise. As of the date of this document, no overlap between these resources and federal oil and gas were known to occur.

NATIONAL AREAS — No surface occupancy or use on federally-designated natural areas, state-dedicated nature preserves, or state-managed natural areas.

ELK WINTER RANGE — No seismic exploration, construction, or other development on elk winter range during the period November 30 through May 1.

ELK CALVING RANGE — No seismic exploration, construction, or other development on elk calving range during the period June 1 through July 1.

BIGHORN SHEEP WINTER RANGE — No seismic exploration, construction, or other development on bighorn sheep winter range during the period December 1 through April 1.

BIGHORN SHEEP CALVING RANGE — No seismic exploration, construction, or other development on bighorn sheep calving range during the period April 1 through June 15.

- State capital**
- County seat**
- City, town, or village**
- Scheduled service airport**

- Interstate highway**
- U.S. highway**
- State highway**
- Other principal roads**

- Population**
- 100,000 to 50,000**
- 50,000 to 30,000**
- 30,000 to 15,000**
- 15,000 to 5,000**
- 5,000 to 1,000**
- 1,000 to 500**
- less than 500**

Population indicated by size of circles.
